

EVERYONE should be afraid of *dirty instruments*

enzo

INSTRUMENT WASHER SOLUTION

Total care outside the box.

Ultra clean your instruments, cassettes and the interior of your automatic instrument washer with Enzo. By properly cleaning your dental instruments, you are caring for the safety of everyone in your office.

How Enzo works?

- ✦ Enzyme boost for ultra clean
- ✦ Phosphate free
- ✦ Neutral pH
- ✦ Non corrosive
- ✦ Non foaming
- ✦ Spot free results

Soiled instrument.

ENZYME BOOST
breaks down bioburden and debris into smaller pieces.

New surfactant technology easily sweeps away broken down bioburden and debris.
NO RINSE AGENTS NECESSARY!

For automated washers

3.8 L

= Enzo has 80% LESS residue than the leading brand!

To order Enzo or for more information, contact your District Sales Manager or Germiphene at 1.800.265.9931 | info@germiphene.com | www.germiphene.com

If it's not clean, it CAN'T be sterilized!

Cleaning should precede all disinfection and sterilization processes. Cleaning involves the removal of debris (organic or inorganic) from an instrument or device. If visible debris is not removed, it will interfere with microbial inactivation and can compromise the disinfection or sterilization process.¹

Using unsafe instruments can cause you and your patients harm.

Efficient	Our proprietary blend of advanced surfactant technology results in ultra clean instruments, cassettes and washer interior.
	The enzymes naturally remove bioburden and contaminant microorganisms on instruments and cassettes used in your dental practice.
	The synergistic combination of surfactants and enzymes is especially designed for use in washer settings such as high temperatures. This kind of clean results in less build up in the filter and washer arms—this means you clean less.
3 in 1	Enzymes fight hard against organic debris for a clean superior than surfactants alone.
	Enzo's formula regulates any kind of water, no need for salt tablets.
	Enzo leaves no residue behind, no need for a separate rinse agent.
Safer	Enzo allows you to clean responsibly using products that will not pollute our waterways or cause ecological imbalances.
	Enzo's neutral formulation is tough on debris, but gentle and non corrosive where it counts. Safe for hinged/unhinged instruments and all instrument washer parts including plastics, rubbers and metals.

60 Day Money Back Guarantee!

- + Works better than the competition!
- + \$AVE hundreds of dollars throughout the year!

Consider these products for total instrument care

ET.FOAM | Enzymatic Transporation Foam

- Keeps soiled instruments moist
- Ideal for use prior to instrument washers
- Enzyme boost

REMEMBER to rinse instruments thoroughly before placing in the instrument washer when using this type of product!

SURGICAL MILK | Instrument Lubricant

- Inhibits rust and keeps instruments shiny
- Effective in steam, dry or chemical vapour sterilizers
- Reduces instrument repair and replacement costs
