treatments  
per bottle

## The ideal fluoride treatment for:

- Patients with gag reflex. No fluoride trays required.
- Not recommended for children under 6 years of age.
- Patients with allergies to dyes.
- Patients who have recently whitened their teeth.
- Non etching. Recommended for patients with composite and porcelain restorations.
- Excellent for patients who cannot tolerate acidic solutions, especially those with reduced salivary flow due to chemotherapy, radiation or xerostomia.

## Neutrarinse aids in the prevention of the following risks:

- Gingival recession
- Partial/over denture wear
- Longevity of tooth retention
- Periodontal disease
- Recurrent decay
- Decay around crown margin

No dye!
