

Temporarily **eliminating pain**
makes everyone's job easier *including your patient's*

TOPICAL ANESTHETIC GEL

Gluten
FREE

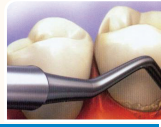

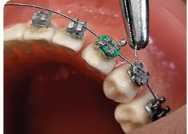

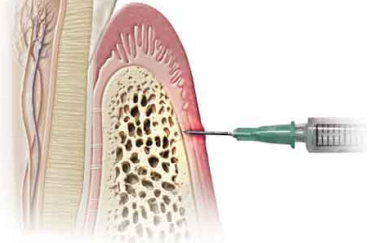

DIN 01930699

Effective	Minimizes the pain in oral mucosal tissue arising from needle punctures, deep scaling procedures, prosthetic adjustments, clamp or crown placement, removal of primary teeth and suture removal.
	The synergy of benzocaine and tetracaine results in a fast and long lasting anesthetic.
No-gagging	Zap can be used to reduce the pharyngeal (gag) reflex associated with placing dental materials like impression trays and x-ray film into the oral cavity.
Convenient	Award winning <i>one touch</i> jar eliminates the chances of cross-contamination and dispenses the right amount of gel each time, reducing waste. The frosted dispenser shows you how much product is left in the jar so you can reorder efficiently.
Fast-acting	Topical anesthesia within 30 seconds. Topical anesthesia for a minimum of 10 – 15 minutes.*
Taste	Great flavour eliminates any bitter aftertaste.

Zap is ideal for:

50g	Bubble Gum	Cool Mint	Strawberry Ice
