

# Neutragel

## Neutral Sodium 1.1% Fluoride Gel

Gentle, effective fluoride treatment developed specifically for “at risk” patients.

- Suitable for Chemotherapy, radiation and Xerostomia patients
- Unflavoured, unsweetened, uncoloured and alcohol free
- Leaves no bitter after taste
- Stabilized gel base
- Gentle in the Mouth
- Controls Caries

Neutral 1.1% sodium fluoride is recommended by cancer clinics across the country.<sup>1</sup>

made in Canada

<b>It Works</b>	Daily use of neutral pH fluoride treatment (Neutragel) will help prevent cavities. <sup>2</sup>
	Sodium Fluoride is the most commonly used agent in the form of gel, mouth wash or varnish for prevention of radiation caries. <sup>3</sup>
<b>It's Safe</b>	Neutragel is gentle on crowns, bridges, composites and other aesthetic restorations.
	Neutragel can be used daily (or as prescribed).
	Neutragel is non-etching on porcelain or ceramic filled restorations

### INSTRUCTIONS FOR PATIENTS USING SUPPLEMENTAL FLUORIDE

#### If using a tray:

- Place a thin ribbon of fluoride gel in each tray.
- Place the trays on the teeth and leave in place for 4 minutes. If gel oozes out of the tray, you are using too much.
- After 4 minutes, remove the trays and spit out any excess gel.
- Rinse the applicator trays with water.
- Do not eat, drink or rinse for 30 minutes.

#### If using a brush-on method:

- After brushing with toothpaste, rinse as usual.
- Place a thin ribbon of gel on the toothbrush.
- Brush for 2 to 3 minutes.
- Spit out any excess gel.
- Do not eat, drink or rinse for 30 minutes<sup>4</sup>.
