Disinfectant and cleaner for use on non-invasive devices, equipment and surfaces in medical, surgical and dental health care facilities such as stethoscopes, stainless steel or plastic trays and alligator clips.

Replace section with: GamaCide effectively kills the following microorganisms at room temperature (20 C) with a 1 minute contact time: Mycobacterium terrae ATCC 15755, Staphylococcus aureus ATCC 6538, Salmonella choleraesus ATCC 10798, Pseudomonas aeruginosa ATCC 15442, Escherichia coli NCTC 8196, Enterococcus hirae ATCC 10541, Poliovirus 1 strain Chat ATCC VR-1562 and Influenza A viruses. Effectively inactivates SARS-Cov-2 (COVID 19), Herpes Simplex 1 virus, Human immunodeficiency virus type 1, Human hepatitis B virus in 2 minutes. A 3-minute contact time is required to kill Trichophyton mentagrophytes ATCC9533.

DIRECTIONS: Appropriate glove protection is recommended prior to use of product. Use where control of the hazards of cross-contamination is of concern. Prior to surface disinfection, clean soiled surfaces by saturating surface with GamaCide³ solution allowing surfaces to remain wet for 30 seconds, then wipe clean using a fresh paper or cloth towel. Repeat the cleaning process until surfaces are visibly clean. Make sure surfaces are free of all gross filth and heavy soil. Discard paper towels or launder cloth towels before reusing. DO NOT SWALLOW.

GENERAL DISINFECTION: Apply GamaCide³ solution to surface. Allow surface to remain wet for 3 minutes at room temperature (20°C) for broad spectrum disinfection then rinse or wipe dry using a clean paper or cloth towel. Discard paper towels, or launder cloth towel before reusing. Surgical instruments must be sterilized according to manufacturer's instructions after cleaning with GamaCide3. Do not mix with detergents or other chemicals. Use undiluted. Do not reuse the same solution after application on medical device(s).

PERSONAL PROTECTION: Wear appropriate barrier protection such as gloves, gowns, masks or eye coverings. Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces/objects before disinfection. Wipe the pre-cleaned area to be disinfected. Allow surface to remain wet for 3 minutes for broad spectrum disinfection.

ULTRASONIC CLEANING SOLUTION/ MANUAL CLEANER: Thoroughly pre-rinse objects under running water to remove visibly gross debris. Immerse instruments in solution and activate ultrasonic unit for a minimum of 1 minute. For manual cleaning, immerse instruments in solution and scrub using a stiff bristle brush until visibly clean (submerge objects while scrubbing). Rinse thoroughly. Change solution as it becomes diluted or

CONTRAINDICATIONS: Not for use in hospital nurseries or on children's toys. Professional use only. Do not use to disinfect invasive devices. Invasive devices must be disinfected or sterilized prior to use.
